Video Monitoring and Information Management System

Phorcas is a sophisticated security information system designed to integrate multiple sub-systems into a powerful crime fighting solution. By integrating information from all available resources, performing contextual analysis using present as well as historical data, crime can be effectively prevented.

Features include:

- **Intelligent Video Display**
- Expandable
- Multiple operator stations
- Video Wall Functionality
- Integration with
 - ⇒ Video systems (1-800 cameras)
 - ⇒ ANPR
 - ⇒ Pan-Tilt cameras
 - ⇒ Biometrics
 - ⇒ Access Control
 - ⇒ Radar
 - ⇒ System Health Monitors
- Video Analytics include
 - ⇒ Motion Detection
 - ⇒ Drone detection
 - ⇒ Crowd activity
 - ⇒ Object identification
 - ⇒ Object removal
 - ⇒ Facial Recognition

Above: The **Phorcas** system can be integrated with multiple cameras, ANPR, biometrics and other third party solutions to provide effective monitoring and prevention.

Typical applications include:

- Security Control Systems
- Laboratories
- Industrial Facilities
- National Key Points
- Government Institutions
- Large Corporates
- Military Applications
